

**N10S/N15S**  
Order Picker/ Stacker

### Order picking and stacking

N10S/ N15S is the perfect combination between stacking and order picking. With a lift height of up to 5500 mm and a low step-in height, stacking and order picking is easy. It ´s built as a counterbalande truck with free hanging forks which makes it incredibly flexible for handling most cargo. Short wheel base and centered rear wheel makes the truck agile. The truck is available in 1000/1500 kg capacity and can be equipped with several different carriag- es and other options.

**Stacking / order picking** N10S / N15S can be equipped with a triplex mast with a lifting height up to 5500 mm and Abekos low step-in height it is an excellent forklift for both stacking and order picking.

**Workplace** All controls are positioned to offer a wide variety of driving styles. N10S/ N15S also offers dual controls for driving in both directions

**Safety** The driver view is excellent no matter which direction the truck is going. Easy in- and out in both directions makes the truck very flexible and saves time for the driver.
