

OPL 10 1.2/2.1
Order Picker

OPL 10 - an investment that pays off

The OPL 10 is a heavy duty machine designed for maximum performance and driver safety. Built to deliver the best overall economy with extensive driving – long hours, day after day, year after year. Thanks to ABEKO's long life you not only get an optimal overall economy, you also contribute to a reduced environmental impact and a reduction in the waste of resources.

Actil's trucks are a product of Swedish engineering and are built in Sweden.

Ergolift / fixed forks All lift heights on OPL can be equipped with either ergolift for an ergonomic picking or with fixed forks.

OPL 10 2.1 Lift up to 2100 mm makes picking on several levels easy and with overhead guard and side gates it's safe.

Workheight With ergolift the forks is adjustable to always be at a comfortable height. In it's up position the EUR-pallet is at a perfect height so that the driver easily can put down goods without strain.

Safety

Speed reduce The driving speed gradually decreases when turning and while raising the platform

Pulsing brake Minimise the risk for the drive wheel locking or lose grip from the surface when braking

Protection All models can be equipped with both gates and overhead guard.
