ABEKO SA - an investment that pays off

The SA 13/16/20 is a heavy duty machine designed for maximum performance and driver safety. Built to deliver the best overall economy with extensive driving – long hours, day after day, year after year. Thanks to ABEKO's long life you not only get an optimal overall economy, you also contribute to a reduced environmental impact and a reduction in the waste of resources.
Actil's trucks are a product of Swedish engineering and are built in Sweden.

A workplace for healthier drivers
Ergonomics and operator safety with top-class driver protection and a work environment that is built on the basis of the driver's safety and comfort.

Innovation that pays off
The key to the best overall economy is high quality, reliability and long life. In these areas, ABEKO is at the absolute forefront.

Big possibilities in a compact unit
The Premium Touch Display gives the operator superior control over both the load and the truck. Load- and liftheight indicator are now standard.
